Kyiv Medical University of UAFM is a first private university among the former Soviet Union countries, founded in 1992 on the basis of combination of standard and alternative medicine. The is accredited by the Ministry of Education and Science of Ukraine and licensed by the Ministry of Education and Science of Ukraine for the 4th accreditation level.

Kyiv Medical University of UAFM appears to be unique higher education institution, where two main areas of Medicine are developed in scientific search and taught for national and international students – standard medicine and alternative medicine. Training at the University designed in accordance with curricula and programs of the state standard, including advanced study of “alternative medicine”, including such specific disciplines as: Pharmacology, Herbal Medicine, Homeopathy, Chiropractic, Reflexology and others.
The Faculty of general medicine at the Kyiv Medical University offers a 6 year undergraduate program according to the license by Ministry of health and education of Ukraine. The program is a 6 year Undergraduate program leading to M.D Physician (MBBS) qualification which is recognized by the Ukrainian ministry of health to be enrolled as a practitioner of general medicine in Ukraine and also WHO hence making the university a leading choice by foreign students for MBBS in Ukraine.

The faculty offers education in English, Russian And Ukrainian medium of instructions. The six year program is a complex program with each academic year divided into two semesters i.e. Fall and Spring semester. Each semester has their own curriculum with a student required to abide by all the internal curriculum rules and regulations set up by the university for MBBS in Ukraine.

The foreign students have their own faculty of general medicine with the entire course conducted in English. The university has its curriculum for international students set up according to the EU(European Union) rules with first three years dedicated to Pre clinical subjects and the final three years dedicated to the clinical subjects.
Academic processes and procedures at KYIV MEDICAL UNIVERSITY is done within the accompanying forms: classrooms classes (classrooms classes, labs, practical, workshop classes, seminars and consultations), practicing of individual works and projects, undergraduate's individual work, functional trainings and control measures.

Lecture is the primary type of leading training sessions, which is intended for learning material in the theoretically way with the utilization of scientific accomplishments and achievements and defines the essential content of all training sessions.

Practical trainings are the form of classes, where theoretical knowledge of a specialization manner is practiced for the better of the students. Abilities, skills and practical experience are functionally executed. Usage of practically environment advances the students into various tasks and fields.

Classes where the students intensifies their theoretical knowledge in their stream, become the experienced one in the methodology of accomplishing the research and experiments into their specified stream and conduct the practical on their own yet under the guidance of a specialized and experienced faculty, obtain the convenient knowledge of working with laboratory apparatuses, computers, instruments etc.

Seminars are basically another form of training sessions where an experienced and applicable instructor/lecturer arranges and organizes the healthy discussion on some previously learned and academic topics. Students get to prepare their performances on the basis of individual assignments which could be in the form of essays and topics etc.
